

SEQUENTIAL RACK & BIN LABELS

Inverted Labels are shown on left, (code is inverted) Standard Labels shown on right. Both are available as standards.

Aptus Identification Field Defense Label™ material is an excellent choice for coding transport racks and bins. Suppliers are placing these labels on racks and bins where coded scannable sequencing is required for correct part selection. The labels are scanned and the corresponding production parts are pulled from the rack and bin. The scans verify that the user is pulling the part in the right sequence, providing critical error proofing for their builds.

Labels are available in sheets, pre marked with the correct sequences you specify from 01 to 99 with a scannable bar code of the number above the human readable.

- The standard set up fee of \$68.00 is waived for this product; there is a \$20.00 batch fee.
- Labels are 58 Mm X 35 Mm.
- PN: A-FD-58X35-C.
- Labels are available in *any* quantity but there is a minimum order of \$100.00.
- Sequences must be submitted on an Excel spreadsheet with your order, one number per cell, as you wish them to appear.

- Approved format for Chrysler Racks
- Approved material for long term use
- Comes ready to apply, marked with 2 digit numeric sequences, in 3 of 9 code, inverted or regular
- Adheres to multiple surfaces for a permanent bond

- Production lead time is 2 To 3 weeks.
- Rush service is available for a fee, please inquire directly.
- We accept Visa, MasterCard, Discover and American Express.
- Terms may be established with approved credit.
