

Freedom Technologies UID Compliance Mobile Cart

ID ADVANTAGE™ Turn-Key UID Compliance

- Performs a wide variety of direct part marking plus label and tag printing/ marking along with verification and validation of the UID marks.
- The Compliance Mobile Cart includes UID compliance software that not only performs every mandated function, including communication with the UID Registry; but can also be expanded to perform entire plant wide and organization wide error proofing, traceability, inventory tracking, RFID compliance, etc.

Freedom Technologies, the leader in Turn-Key UID Solutions, not only provides plant/organization wide solutions, but now offers another solution for your compliance needs with the development of the Freedom UID Compliance Mobile Cart.

The Freedom UID Compliance Mobile Cart brings compliance capabilities to a convenient mobile cart that features industrial strength hardware components and a suite of UID compliance applications

offerings. This allows users to complete the entire process including marking, verification, validation and registry from one convenient location that is flexible enough to meet individual needs.

With a customized design and equipment configuration, the Freedom Compliance Mobile Cart provides exactly what the customer needs. It performs a wide variety of direct part marking plus label and tag printing/marking along with verification and validation of the UID marks. The Compliance Mobile Cart includes UID compliance software that not only performs every mandated function, including communication with the UID Registry; but can also be expanded to perform entire plant wide and organization wide error proofing, traceability, inventory tracking, RFID compliance, etc. Additionally, the system can include wireless mobile handheld computers that read UID/RFID/Barcodes and perform many tasks in wireless or batch mode at great distances from the cart.

**Plus - RFID Compliance
MADE EASY**
